

PRESS RELEASE

Jan 10

Technical Expertise from Resintex Technology and Scott Bader at SEATEC 2010.

Resintex Technology will be exhibiting from February 10-12th at the SEATEC exhibition in Carrara, Italy. SEATEC has become a key exhibition for Resintex Technology due to their specialization in providing RTM and vacuum infusion technical expertise and product selection advice to leading Italian FRP marine boat builders. They also distribute across Italy a wide range of composite products from leading suppliers, such as Crystic[®] resins, gelcoats and adhesives from Scott Bader. This is the fifth year running that they will share a stand at the show with key supplier partners; this year the focus of the Resintex SEATEC stand will be on the range of specialty composites marine products from Scott Bader and SP-High Modulus.

Technical experts will be available on the Resintex stand (Building E, Stand No: 1097) throughout the show for visitors looking for practical 'hands on' advice about topics such as: infusion resin product selection; structural bonding techniques to help increase productivity and reduce weight; or advice on RTM and infusion manufacturing techniques. There will be a team of four from Resintex, including their vacuum infusion specialist and a technical representative, as well as a technical expert from Scott Bader, who will also be on the Resintex stand to help answer technical questions about: Crystic VE, DCPD and UPR infusion resins; the new rapid tooling resin Crystic RTR 4000PA; their range of Crestomer marine structural adhesives which have recently been awarded additional RINA certifications; and their range of Crystic epoxy bonding polyester gelcoats, which have been successfully used globally by a number of racing dinghy manufacturers. Laura Fabi, Marketing & Sales Manager, Resintex Technology commented: *"For Resintex, exhibiting at SEATEC is very important as most key decision makers from all the major Italian shipyards attend this exhibition, as well as getting other visitors from outside of Italy, looking for the latest products and techniques in marine composites."*

To book a technical consultation during the SEATEC show contact Resintex Technology S.r.l., Frosinone, Italy, by phone on + 390775898099 or e mail: info@resintex.it. More information is available on line at www.resintex.it and at www.scottbader.com for details of the full range of products available from Scott Bader Composites.

Resintex Technology has exhibited annually at SEATEC since 2008 with key partners such as Scott Bader.

About Scott Bader
