

Crestabond enables large Chinese EV OEM to lightweight vehicles

Scott Bader products used
Crestabond structural adhesives

Challenge

The Chinese OEM faced the challenge of bonding their spoilers without increasing weight and hindering performance or efficiency.

Solution

They chose our market leading Crestabond structural adhesives for their strength, quality and our renowned technical support. Crestabond enables them to bond their spoilers without using mechanical fixings and thus saving weight.

Working with our technical team, they were also able to use a mechanical dispenser arm for quick and efficient application.

 SCOTT BADER
Making a *positive* difference

Key advantages

Lightweighting and efficiency

Removing the need for mechanical fixings allows the Chinese OEM to reduce weight and increase fuel efficiency, a key focus for electric vehicles.

Long term partnership

Our long term partnership allows alignment on strategic goals and the development of joint projects to solve future needs.

Technical support

Scott Bader's world renowned technical support has helped maximise process efficiency, safety and reduce waste.
