Product Overview
Crestomer Advantage 60 is a structural adhesive that bonds a wide range of substrates with minimal surface preparation and lower odour than competitive materials. It has a white colour, with a geltime of 60 minutes and bonded parts are workable in 3 hours. Crestomer Advantage 60 is based on Scott Bader’s innovative urethane acrylate technology and exhibits exceptional impact strength and toughness. Its excellent adhesion and gap filling capabilities offer great flexibility in design with significant time and cost savings.

Features and Benefits
- Urethane acrylate base
- Excellent retention of toughness
- Excellent fatigue and impact resistance
- Non sag
- Excellent adhesion and high elongation at break
- Highly thixotropic
- Perfect gap filling solution
- Application on vertical surfaces

Application Properties
- Working Time: 60 Minutes
- Fixture Time: 3.0 hours
- Gap Filling: 1 – 15 mm/ 0.04 - 0.6 inch
- Colour change (over cure): None
- Recommended Application Temperature: 18°C - 25°C/ 66°F - 77°F

Mechanical Properties
- Tensile Strength: 22 - 25 MPa
- Tensile Modulus: 400 - 600 MPa
- Tensile Elongation: 100 - 120%
- Hardness: 55 Shore D
- Water Absorption: 0.68%
- Approvals: -
Recommended Substrates

**Recommended Substrates**

- **Metals**
  - Stainless Steel
  - Aluminium

- **Wood**
  - Marine Ply
  - Balsa

- **Composites**
  - GRP/FRP
  - Polyester Resin
  - DCPD
  - Vinyl Ester
  - Epoxy

**Non - Recommended Substrates**

- -

**FRP to FRP Bond Strength**

Surface Preparation

Crestomer Advantage 60 has excellent adhesion to FRP material provided that the surface has been maintained free of dust and grease. This can be guaranteed by the use of proprietary stripable cloths such as peel ply (without lubricant contaminates). If the laminate surface is more than three days old it is recommended that they are lightly abraded and wiped with acetone or styrene on a lint-free, clean cloth prior to bonding.

Application

Crestomer Advantage 60 is supplied ready to use in pre-packed 380ml co-axial cartridges with no hand mixing required. Crestomer Advantage 60 is supplied pre-accelerated and contains advantage catalyst within the cartridge. The mixer indicator system imparts a neutral, opaque white colour and this blends well in cosmetically sensitive applications.

For industrial/ commercial use only. The user must determine the suitability of a selected adhesive for a given substrate and application. Contact your local Scott Bader representative for questions or assistance with the selection of adhesives for your use. This product is intended for use by skilled individuals at their own risk. Recommendations contained herein are based on information we believe to be reliable. The properties and strength values are obtained under controlled conditions at the Scott Bader laboratory.

Storage and Shelf Life

Crestomer Advantage 60 should be stored internally in its original container. It is recommended that the storage temperature should be between 15°C and 20°C/ 60°F and 68°F. Cartridges should be opened only immediately prior to use. Products should never be frozen.

The shelf life for Crestomer products is defined from date of manufacture if stored as recommended. The expiry date is indicated on the product labels.

Packaging

Crestomer Advantage 60 is supplied in 380ml co-axial cartridges.

Health and Safety

See separate Material Safety Data Sheet.
