

CrysticROOF Revive restores 1000 m² roof in South West England

Company - Fibreglass Supplies Limited

Location - Plymouth, UK

Fibreglass Supplies are a Scott Bader Distributor based in the South West, selling a range of Scott Bader products including CrysticROOF Revive.

Scott Bader and Fibreglass Supplies have been working in partnership for many years to serve their highly valued customers in Plymouth and the surrounding areas.

The latest project involved repurposing a 1000 square metre asphalt roof of a large office building. The roof had succumbed to the elements and needed a new lease of life. Instead of relaying the entire roof, CrysticROOF Revive offered the customer significant cost and time savings by giving the tired roof a brand new waterproof coating.

Russell Ferris

Director, Fibreglass Supplies Ltd

“A+A Concrete Repair approached us for a cost effective solution to the repair of a large 1000sqm asphalt roof. We recommended CrysticRoof Revive for the ease of application and the time saved on installation. The benefit to our customer was a project delivered on time and on budget.”

Key benefits of CrysticROOF Revive

- **Fast** - just one coat needed on a GRP roof
- **One component** - no hardeners or catalyst, no matter what season you're applying it in
- **Cost effective** - fast application and fewer coats means less material and lower costs
- **UV stable** - doesn't break down with exposure to UV or pollution
- **300% elasticity** - 6 times more elastic than GRP and can be used over large roof areas
- **Weather resistance** - a wide service temperature range means it stays secure in all weather
